PRODUCT SPECIFICATION

Antimony metal, grade Sb 99.65

Fire-refined antimony metal produced at the Chatkal Chemical Smelting Complex, Sary-Bulak District. Used in lead-acid batteries, alloys and as a raw material for antimony trioxide.

Antimony ingots on steel-strapped pallets.

Chemical composition, % by mass

ELEMENT	GRADE SB 99.65
Sb, not less than	99.65
As, not more than	0.050
Pb, not more than	0.100
Fe, not more than	0.020
S, not more than	0.040
Cu, not more than	0.010
Bi, not more than	0.003

Form and packing

ITEM	DETAILS
Form	Ingots of about 25 kg
Packing	Steel-strapped pallets of about 1 t
Shipment	By rail from the Chatkal siding, or by truck, north through Kazakhstan
Documents	Certificate of analysis from the Chatkal laboratory with each lot

Sampling and analysis

Each lot is sampled and analysed by the Chatkal laboratory before dispatch. Independent inspection at loading can be arranged at the buyer's expense.
